FIT3048 Industry experience studio project 2 - S1 2023

Started on	Monday, 22 May 2023, 2:41 PM
State	Finished
Completed on	Monday, 22 May 2023, 2:47 PM
Time taken	6 mins 27 secs
Marks	6.42/9.00
Grade	**7.13** out of 10.00 (**71**%)

[Print friendly format](#)

Question 1

Partially correct

Mark 0.50 out of 1.00

3048 Acceptance Criteria are important, why?

Select one or more:

- ☑ Ensures that we have something to work to, to show that a user story is complete. ✔

- ☑ Moving from the to do lane to the done lane ✖ This is not why they are important

- ☑ Ensures that developers know exactly what the client wants ✔

- ☐ Moving from the backlog lane to the to do lane

- ☐ Moving from the waiting lane to the to do lane

Your answer is partially correct.

You have selected too many options.
The correct answers are: Ensures that we have something to work to, to show that a user story is complete., Ensures that developers know exactly what the client wants

---

Question 2

Partially correct

Mark 0.42 out of 1.00

Which of the following are user stories? Please note - marks will be taken off for wrong answers.

Select one or more:

- ☑ Given I am logged in as an admin, when I press the export button then a .xls file should be downloaded with a list of orders for the past month. ✖ This is a typical way to write acceptance criteria for a user story, not a user story itself. Each user story would typically be accompanied by several of these "given/when/then" type statements to help verify whether or not the user story is implemented correctly.

- ☐ Users should be able to export orders from the system.

- ☐ As a user, I need to be able to export orders from the system.

- ☑ As Joe, the sales manager, I need to be able to analyse the last month worth of orders in order that I can see which products are selling most. ✔ Yes, a user story is a small, self-contained unit of development work designed to meet a specific goal within a product. It is usually written from the user's perspective and follows the format: "As [a user persona], I want [to perform this action] so that [I can accomplish this goal]. It can be broken down into smaller tasks, or even smaller user stories, each with acceptance criteria.

- ☑ There needs to be an export button above the orders list, and when clicked it should export a list of orders in .xls format. ✖ No, Remember a user story is a small, self-contained unit of development work designed to meet a specific goal within a product. It is usually written from the user's perspective and follows the format: "As [a user persona], I want [to perform this action] so that [I can accomplish this goal]. It can be broken down into smaller tasks, or even smaller user stories, each with

acceptance criteria.

Your answer is partially correct.

You have selected too many options.
The correct answer is: As Joe, the sales manager, I need to be able to analyse the last month worth of orders in order that I can see which products are selling most.

Question 3

Correct

Mark 1.00 out of 1.00

Problems with SDLC, as opposed to using an Agile approach?

☑ Not keeping up with changes required as business environments change ✔

☑ Client not seeing the system in action until completion. ✔

☑ client not being able to see what they are actually getting, only though documented models ✔

☑ when a system is implemented, there is almost always another phase immediately - Maintenance ✔

☑ doesn't engage stakeholders ✔

Your answer is correct.

The correct answers are: Client not seeing the system in action until completion., Not keeping up with changes required as business environments change, doesn't engage stakeholders, client not being able to see what they are actually getting, only though documented models, when a system is implemented, there is almost always another phase immediately - Maintenance

---

Question 4

Partially correct

Mark 0.25 out of 1.00

3048 Stand-Ups are important, why?

Please note that marks will be taken off for incorrect answers

Select one or more:

☑ Builds and improves collaboration and communication ✔

☑ Shows any blockers that team members may have ✔

☑ Shows transparency about what each team member is doing ✔

☑ What I did since last stand-up, what I am about to do ✖ This is not why are they important

☐ Know exactly what is happening in the project

Your answer is partially correct.

You have correctly selected 3.
The correct answers are: Shows transparency about what each team member is doing, Know exactly what is happening in the project, Shows any blockers that team members may have, Builds and improves collaboration and communication

---

Question 5

Partially correct

Mark 0.75 out of 1.00

3048 Trello Boards are important, why?

Please note, marks will be taken off for incorrect answers.

Select one or more:

- ☐ Waiting Lane
- ☐ The Done Lane
- ☑ It makes the project transparent, everyone can see what each team member is doing ✔
- ☑ You can see exactly which user stories are being worked, which have been completed and which are yet to complete. ✔
- ☑ It is a very visual transparent way of looking at a project's progress. ✔
- ☐ A team member does not work on tasks already taken by someone else
- ☐ The To do lane

Your answer is partially correct.

You have correctly selected 3.
The correct answers are: It is a very visual transparent way of looking at a project's progress., A team member does not work on tasks already taken by someone else, It makes the project transparent, everyone can see what each team member is doing, You can see exactly which user stories are being worked, which have been completed and which are yet to complete.

Question **6**

Correct

Mark 1.00 out of 1.00

Q1, Pick 2 (only 2) of the following, that fit with Agile

Select one or more:

- ☐ It should be used for all systems in an organisation.
- ☑ Focuses on the people doing the work and how they work together. ✔
- ☑ Solutions evolve through collaboration with teams/client/practices ✔
- ☐ It is a methodology

Your answer is correct.

The correct answers are: Focuses on the people doing the work and how they work together. , Solutions evolve through collaboration with teams/client/practices

---

Question **7**

Correct

Mark 1.00 out of 1.00

EXPO How long should an elevator pitch be?

Select one:

- ○ as long as it takes, to explain all the details about our project
- ● 30- 60 seconds ✔

Your answer is correct.

The correct answer is: 30- 60 seconds

Question **8**

Partially correct

Mark 0.50 out of 1.00

3048 Personas are important, why?

Please note that marks will be taken off for incorrect answers

Select one or more:

☑ Can be many for each user story   ✖ This is not why they are important

☑ Creates empathy for the user of the system that we are about to develop   ✔

☑ Makes us think about what we should design and develop knowing what the user is like   ✔

☐ Only one for each user story

Your answer is partially correct.

You have selected too many options.

The correct answers are: Creates empathy for the user of the system that we are about to develop, Makes us think about what we should design and develop knowing what the user is like

---

Question **9**

Correct

Mark 1.00 out of 1.00

Philosophy of agile manifesto (Beck et al., 2001) is concerned with which of the following values? Please note - marks will be taken off for wrong answers.

☑ values Responding to change over following a plan   ✔

☑ values Customer collaboration over contract negotiation   ✔

☑ values Working software over comprehensive documentation   ✔

☐ values Using specific processes, procedures, or best practice

☐ values Using a rigid framework

☑ values Individuals and interactions over processes and tools   ✔

Your answer is correct.

The correct answers are:
values Individuals and interactions over processes and tools,

values Working software over comprehensive documentation,

values Customer collaboration over contract negotiation, values Responding to change over following a plan
