State	Finished
Completed on	Monday, 6 March 2023, 2:15 PM
Time taken	4 mins 13 secs
Marks	4.05/6.00
Grade	**6.75** out of 10.00 (**68**%)

[Print friendly format](#)

Question 1

Correct

Mark 1.00 out of 1.00

A retrospective

- a.   involves every team member at a meeting, reviewing how well a previous iteration went and creating and documenting, jointly, processes for improvement. ✓

- b.   is a result of 1 person (usually the BA) on the team reviewing how well a previous iteration went and creating and documenting processes for improvement.

Your answer is correct.

The correct answer is: involves every team member at a meeting, reviewing how well a previous iteration went and creating and documenting, jointly, processes for improvement.

Question 2

Partially correct

Mark 0.80 out of 1.00

Why is it important to have stand-ups? Please note marks will be taken off for wrong answers.

Select one or more:

- ☑ Improves shared goals across the team ✓

- ☐ So that each team member can say What did I work on yesterday? What am I working on today? What issues are blocking me?

- ☑ Build and improves collaboration and communication ✓

- ☑ So that everyone know what each person in the team is doing ✓

- ☑ Team members can see if they can help others, if there is a need ✓

Your answer is partially correct.

You have correctly selected 4.

The correct answers are: So that everyone know what each person in the team is doing, So that each team member can say What did I work on yesterday? What am I working on today? What issues are blocking me?, Build and improves collaboration and communication, Team members can see if they can help others, if there is a need, Improves shared goals across the team

Question 3

Partially correct

Mark 0.75 out of 1.00

Philosophy of agile manifesto (Beck et al., 2001) is concerned with which of the following values? Please note - marks will be taken off for wrong answers.

☐   values Using specific processes, procedures, or best practice

☐   values Using a rigid framework

☑   values Responding to change over following a plan   ✔

☑   values Customer collaboration over contract negotiation   ✔

☑   values Individuals and interactions over processes and tools   ✔

☐   values Working software over comprehensive documentation

Your answer is partially correct.

You have correctly selected 3.
The correct answers are:
values Individuals and interactions over processes and tools,

values Working software over comprehensive documentation,

values Customer collaboration over contract negotiation, values Responding to change over following a plan

---

Question 4

Correct

Mark 1.00 out of 1.00

"Client is going on holidays for 3 months" is a risk

Select one:

◉ True ✔

◯ False

Of course it's a risk. How will you be able to show what you have developed? You will end up developing what you think the client wants, not actually what the client wants, so it really is a risk. This would be in your business vision report.

The correct answer is 'True'.

Question 5

Partially correct

Mark 0.50 out of 1.00

Why is it important to see the client and show them what you have, as often as you can and NOT just at the end of the iteration? Please note marks will be taken off for wrong answers.

Select one or more:

☑   Because it's easier for clients to if the system is what they want from actually seeing what has been developed, or what is being   ✔
developed rather than documents or models.

☐   Because they are part of the team.

☐   There is no need, the client will see what has been completed at the end of the project.

☑   in case new requirements or changes in the business environment have come up and then they can be added even though the   ✔
iteration isn't finished.

☐   in case priorities have changed, since the last time you saw your client.

Your answer is partially correct.

You have correctly selected 2.

The correct answers are: Because it's easier for clients to if the system is what they want from actually seeing what has been developed, or what is being developed rather than documents or models., in case new requirements or changes in the business environment have come up and then they can be added even though the iteration isn't finished., in case priorities have changed, since the last time you saw your client., Because they are part of the team.

Question **6**

Not answered

Marked out of 1.00

Paving the cowpath means ?

Select one or more:

- [ ] helping find the best dependency path of tasks to be performed
- [ ] looking for problems in analysis that may affect the development path
- [ ] just automating existing processes without thinking too much about whether or **not** that process **is** effective or efficient.
- [ ] just assuming the the way it's always been done is the best way.

Your answer is incorrect.

The correct answers are:
 just automating existing processes without thinking too much about whether or **not** that process **is** effective or efficient., just assuming the the way it's always been done is the best way.
